# Welcome!

This kit has been fully prepared for you so you can record professional training videos easily, even if you have never used video equipment before.

You do NOT need technical experience.

Just follow the steps listed inside this quick start guide and you will be on your way to a commercial level video production.

Thank you for your important and valuable expertise and contribution.

## STEP 1

### ✓ Choose your setting

1. Find a quiet room with neutral color
2. Add some texture to background with book shelf or plant or picture
3. Ensure lighting is warm

### ✗ Try to avoid:

- Window directly behind you
- Too much lighting that casts heavy shadows
- Dressing in stripes or patterns

## STEP 3

### ✓ Set up the camera

1. Lift the camera tripod to eye level
2. Remove lens cover
3. Open the back camera screen and flip towards you

## STEP 2

### ✓ Open the case

1. Open the case on flat surface. Each tab has a button to depress to lift up
2. Carefully remove:
  - a. The pre-assembled REMOTE STUDIO camera configuration
  - b. The extra light stand
  - c. The lavalier / lapel mic
3. Open the tripod on the camera configuration and light stand

## STEP 4

### ✓ Prepping the audio

1. For shotgun mic on side of camera, Flip UP switch all the way up (located on side of mic)
2. Turn ON the DJI receiver at top of camera until it turns GREEN
3. Turn ON DJI lapel mic until it turns GREEN
4. Affix DJI lapel mic on top garment about 3-4" from your mouth (with clip or magnet)

## STEP 5

### ✓ Getting ready to shoot

1. Set camera/tripod at eye level and about 4-6 feet away
  2. Ensure you are center frame from waist up and with about 2 fingers of space from top frame and top of your head
- **The camera settings are all pre-set for you at 1080p and 30FPS**

## STEP 6

### ✓ Preflight set up

1. Flip the ON switch on top of camera
2. Hold down and switch ON the light on top of camera
  - If light is too bright, adjust by clicking ON/OFF switch and/or add one of the color screens
3. Flip up on DJI screen then click to record with Mic (mic and receiver will turn RED)

## STEP 7

### ✓ Let's record it

1. Press RED record button on top of camera
2. CLAP your hands to sync camera audio and lapel audio
3. Review your notes prior to looking up at camera, PAUSE, then speak directly into the camera LENS
4. Record all the way through your presentation.

## STEP 8

### ✓ Finalize it

1. Press RED record button on top of camera to turn off recording. Then click OFF camera
2. Click to STOP recording audio
3. Hold down and turn OFF DJI mic and receiver
4. Switch DOWN/OFF shotgun mic
5. Turn off light(s)

## STEP 9

### ✓ Package up

1. Do NOT remove SD card.
2. Collapse tripod(s)
3. Affix lens cover back onto camera
4. Package up each item into labeled slots in case
5. Close case and secure each clasp
6. Insert case back into shipping box and affix pre-addressed UPS label over top of receiving label
7. Drop off at any UPS Store location

## QUICK TIPS

- The SD Card is pre-formatted and loaded
- The battery should be fully charged but you also have a back up
- Use the extra light if needed or if the glare from the light at the top of the camera is too harsh for your eyes
